* Available on manual transmission only

Please note: Specifications, detailing and finishes differ on the various models available - please consult the specification sheet at the back of this brochure or your dealer for more information.

power + performance

mHAWK

An even more powerful 2.2l mHawk engine provides an impressive output of 103kW @ 3750 r/min and torque of 330Nm @ 1600 to 2800 r/min

The monocoque construction provides stability and an excellent power/weight ratio.

Please note: Specifications, detailing and finishes differ on the various models available - please consult the specification sheet at the back of this brochure or your dealer for more information.

safety

The Stylish New XUV500 is fitted with an alarm and electronic immobiliser to ensure it stays with you. It also comes with a passive keyless entry and locking system so you don't have to fumble with your keys in unfriendly places.

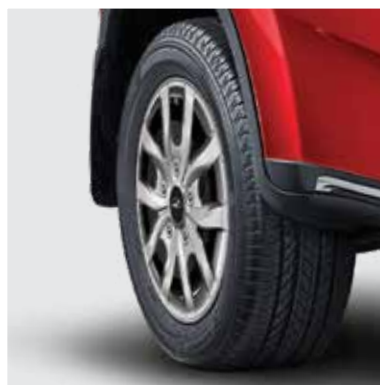

Advanced technology ensures your safety, with six airbags - front, thorax and curtain (W8 and W10), and dual front airbags (on W4 and W6). Side impact beams and crumple zones have been designed to absorb impact and redirect crash energy around the passenger compartment.

Anti-lock Braking System (ABS) with Electronic Brakeforce Distribution (EBD) will bring you safely to a stop in an emergency in the shortest possible without losing control. This is further enhanced with disc brakes on all wheels.

Electronic Stability Program (ESP) with rollover mitigation will keep your wheels on the ground wherever your XUV takes you.
